

The Sustainable Environmental Awareness SEA Initiative

Climate change mitigation measures that save you money!

Environmental Walk-throughs

Duration: Half day

Purpose: A preliminary site assessment will be conducted to assess operations with regard to the environment, including energy and water efficiency. A report will be prepared to provide an overview of (i) the current status of operations with regards to environmental impacts and (ii) recommendations for cost cutting and best environmental practices.

Benefits: Useful information on how your business can reduce utility costs by up to 20% and how to implement best practice to impress clients and fulfil corporate social responsibility targets.

Staff Seminars

Seminar 1: Introduction to climate change & business

Duration: Half day

Purpose: to inform hotel employees of the fundamentals of climate change, its global and local context and why it is necessary for businesses to incorporate appropriate planning measures.

Benefits: After attending this seminar, staff will understand and be conversant with effects of climate change at both the global and local levels. They will be familiar with case studies from around the world and be able to start implementing changes to reduce their current impact on the planet in their everyday lives. Better-informed staff will help to reduce operational costs by being aware of the need to save water and energy.

Seminar 2: Taking action against climate change: how to reduce costs whilst saving the environment

Duration: Half day

Purpose: to inform hotel employees, in particular managers, about how they can take practical action to reduce impacts of their business on global warming.

Benefits: Armed with the new knowledge they acquire in this seminar, managers will be able to implement several cost-cutting strategies within the workplace which will also have a positive effect on our environment. By implementing good practice, your business will gain a competitive edge by showcasing its social responsibility to clients and the public at large.
